Stavros Frangoulidis (Aristotle University
of Thessaloniki)

Programme

The growing scholarly dialogue between cognitive theories and the humanities has recently conquered the scholarly discourse of Classical Studies. The relevant critical discourse has focused on the ways in which the cognitive process explicitly or implicitly runs through mental and bodily processes, as well as through the world of Greek and Roman society, and in particular through culture, technology, science, medicine, philosophy, art, literature and theatre. The conference will raise these questions in the context of Latin texts from Late antiquity, the Middle Ages and the Early Modern Period. The discussion will cover a wide range of texts and topics, such as philosophical theories on the nature of the soul, but also issues such as the literary analysis of metaphors or sociological approaches to the production and dissemination of knowledge. The conference aims to make a substantial contribution to the interdisciplinary dialogue between late Latin literature and cognitive approaches.

Thursday, May 30, 2024

9:00 – 9:15

Welcome and general introduction

PANEL 1. Chair: Chrysanthe Tsitsiou-Chelidoni (Thessaloniki)

9:15 – 10:45
